EXPERIENCE

Software Development Engineer-1

Fynd (Shopsense Retail Technologies Ltd.)

06/2021 - Present Bengaluru, Karnataka

- Designed and built a fully customizable feedback system, allowing users to review and ask questions, allows users to add ratings, headlines, descriptions, and multiple photos or videos. This feature is **now live on Tira Beauty**, increasing customer engagement by 35% and collecting over 10,000 user reviews within six months, enhancing product development insights.
- Designed and implemented a dynamic address page featuring field visibility based on the selected country, enhancing user experience. Incorporated Google Maps integration, allowing location-based selection by city, area, and sector for accurate address details, **this feature is live on Jio Mart, Abraham & Thakore, gofynd, Tira Beauty, and Astra**.
- Created an Instagram Feed Extension for brand websites featuring three distinct viewing options (Grid, Slider, and Gallery Slider) to seamlessly integrate and display Instagram content.
- Added a 23-color variable palette to the theme editor, improving customization options and increasing customer satisfaction through better user experience and brand consistency.
- Implemented a custom page setting configuration to enable the creation of a dedicated custom setting section within custom pages, mirroring the functionality of system pages in [@gofynd/fdk-cli library](#).
- Worked on monitoring tool using Grafana to display error graphs and alert messages, while integrating Coralogix to visualize and manage all log data efficiently.
- Developed Config-Driven Login and Registration page with OTP and password.
- Developed the user interface for an advanced payment and refund payment system, streamlining the refund and advance payment process.

Full Stack Developer Internship

Fynd (Shopsense Retail Technologies Ltd.)

04/2021 - 05/2021 Bengaluru, Karnataka

- Developed a dynamic job portal website enabling user registration, authentication, job search, and application submission.
- Implemented secure user authentication and efficient job search functionalities to enhance user experience.
