PROJECTS

Trident1 FFL Software

(Core PHP, Vtiger,wordpress,bigcommerce,HTML, CSS, Ajax, jQuery, JavaScript, MySQL)

Trident1 is an advanced Point of Sale (POS) system specifically designed for Federal Firearms License (FFL) dealers. This comprehensive solution streamlines sales operations, ensures compliance with legal regulations, and integrates seamlessly with leading e-commerce platforms like WooCommerce and BigCommerce.

Hotel PMS – Ezee Absolute

(Core PHP, HTML, CSS, Ajax, jQuery, JavaScript, MySQL)

A hotel PMS better known as a property management system is an all-in-one software for the hospitality industry. It helps independent as well as hotel groups to effectively manage their operations. The cloud-based hotel PMS system automates all the important tasks such as front-office, bookings, accounting information, guest check-in/check-out, room assignment, and other necessary day-to-day hotel operations. This enables hoteliers like you to take time out to serve your guests better.

Hotel PMS and Channel Manager Revolt App — Mobile Application

(Core PHP, HTML, CSS, Ionic JS, MySQL)

Hotel PMS and Channel Manager System is a feature-rich and flexible hotel software which simplifies the complexity of hotel management. The hotel management system along with the hotel channel manager boosts your revenue while automating your daily operations, giving you a chance to focus on guest experience. The Hotel PMS software and channel manager is ideal for small to mid-sized hotels, motels, B&Bs, resorts, hotel chains, etc.
