Bhavini Purvang Varma

bhavini7kothari@gmail.com / 9429473661 | www.linkedin.com/in/bhavinivarma/

Skills

Languages: SQL, Microsoft SQL 2012, 2016 and 2019, Microsoft Azure, MySQL, MS Access, Power BI, SSRS, SSIS, SAP B1 ERP, Crystal Report, Visual Studio, Chat GPT

Design and create Database Structure and Table, writing T-SQL Queries, View, Cursor, Stored Procedure, triggers and Function and PowerShell scripting.

Database management, Backup, Installation, Configuration, capacity planning, resolving critical database issues.

Experience in SQL Server Best Practice, performance optimization and tuning

SQL Profiler, SQL script and Deployments

Database Migration, SSIS, ETL process

Worked on Azure, AWS, MYSQL, Microsoft Access database

Experience in Deploying and Implementing projects at client side.

Reporting tools like SSRS, Crystal Reports, Power BI and MS Excel.

Managing Customer Calls for Critical Issues. Support on Client Side after Go -Live Project.

Work Experience

Winjit Technologies July 2022 – February 2024 — *SQL Developer | Microsoft Azure DBA*

- Proficient in managing Azure SQL Databases for both production and development environments, ensuring optimal performance and availability.
- Skilled in query optimization and tuning techniques to enhance database performance and streamline operations.
- Experienced in database maintenance tasks including server storage management and database shrinkage to optimize resource utilization.
- Proactively create and maintain table indexes and statistics to facilitate efficient data retrieval and query processing.
- Expertise in monitoring SQL Server jobs and resolving issues related to long-running queries and CPU utilization spikes.
- Proficient in database and data migration strategies, ensuring seamless transitions and minimal downtime.
- Capable of troubleshooting SQL Server errors by analyzing server logs, agent logs, and Windows Event Logs.
- Diligently manage user profiles, roles, access rights, and permissions to uphold data security standards and regulatory compliance for SQL Server.
- Consistently ensure the integrity and reliability of databases by implementing effective backup and recovery procedures.
- Collaborate with cross-functional teams to implement best practices and optimize database infrastructure for business needs.

Lolly.com April 2022 - July 2022 — *SQL Developer DBA*

- Work and maintain database on AWS
- Create and manage Database, Tables, View, Store Procedure and Functions
- Performance monitoring and tuning
- Create and manage Indexes
- Data Migration using SSIS, SQL Server Import–Export
- Query optimization and Data analysis

Ami Organics Ltd July 2021- March 2022 — *SQL Developer DBA*

- Manage Database and Server
- High availability (HA) and disaster recovery (DR) strategies
- Restore and backup of database
- Performance monitoring and tuning
- Handle SAP B1 ERP System and resolve User's issue
- Create reports in SAP B1 and Crystal Report by creating Stored Procedure and Views
- Create Reports using Microsoft Power BI and Microsoft Excel

SSM InfoTech Pvt Ltd November 2018 - July 2021 - *SQL Developer DBA*

- Create database design and manage database as per project
- Work with SP, View, Functions, Triggers and SQL Profiler
- Performance monitoring and tuning
- Create reports using Power BI and SSRS

- Worked on Projects like E-logsheet, X-Studio, In-house projects
- Communicate with clients and resolve issue
- Store data into MS SQL from FTP, MySql and other application
- Database Architecture, Normalization and Query Optimization

Hard N Soft Consultancy Service June 2017-September 2018 — *SAP B1 Consultant | SQL Developer*

- Worked on complex SQL Query, View, Store Procedure for finance and production data
- Worked on SAP B1 UDF, Validations and all standard Modules
- Create reports in excel and Crystal reports as per client's requirement
- Manage and support clients call and resolve the issue

Leemboodi Fashion and Saurbh Saree April 2015- March 2017— *E-Commerce Executive*

- Handle E-Commerce website using excel and HTML
- Upload and manage inventory, Orders, Returns
- Work on other E-Commerce Websites like Amazon, Myntra, Flipcart, Paytm etc

Education

Bachelor of Engineering: Computer Engineering Aug 2010- Dec 2014

Gujarat Technological University, Ahmedabad *CGPA: 7.22/10*

Roles and Responsibility

- **Database Management**: Demonstrated proficiency in the installation, configuration, and maintenance of SQL Servers, ensuring optimal performance and reliability.
- **Cloud Integration**: Extensive experience in designing and managing databases within the Azure Cloud SQL environment, leveraging cloud-based solutions for enhanced scalability and efficiency.
- **Maintenance Utilities**: Skilled in utilizing various maintenance utilities such as Import/Export, Backups, Restore and Attach/Detach Operations to Manage and safeguard data.
- **Performance Optimization**: Expertise in utilizing Dynamic Management Views (DMVs) and Database Console Commands (DBCC) for effective database performance monitoring, ensuring the integrity and responsiveness of databases.
- **Troubleshooting**: **Proven** Ability to troubleshoot issues such as blocking, deadlocks in slow queries, identifying root causes and implementing timely solutions.
- **Incident Analysis and Resolution**: Regularly analyze database incidents, promptly identifying issues and implementing corrective measures to maintain the overall health and performance of databases.
- **Automation**: Successfully automated DBA tasks, including FULL and DIFFERENTIAL backups, disk space reporting and monitoring blocking slow-running queries through the implementation of SQL Agent Jobs.
- **User Management**: Proficient in maintaining database user accounts ensuring adherence to security policies and granting permissions based on specific requirements.

Certification

- SQL and Relational Databases 101 - IBM DB0101EN Certificate on Cognitive Class Powered by IBM Developer Skills Network.
